## Metal Fabricating Solutions

**American Manufacturer of Hydraulic Ironworkers,  
Pivot Circular Cold Saws and Measuring Systems.  
Importer of Excellent Quality Tube and Pipe Notchers, Upcut Saw  
and Utility Band Saw manufactured in Western Europe.**

**50514-CM  
IRONWORKER**

**CPO 350  
COLD SAW**

**AL100U-02  
TUBE & PIPE  
GRINDER/NOTCHER**  
MFG in NL

**SU-280  
UTILITY BAND SAW**  
MFG in ES

**QUALITY    DEPENDABILITY    VERSATILITY    PRECISION    POWER**

**The Solution *PREFERRED* by Metal Fabricators**

# Porta Fab 45

## STANDARD FEATURES

- 45-ton punch station (1-1/8" in 1/2")
- Keyed punch ram for safety
- 4-1/4" throat depth
- 2" die holder
- Punch nut with wrench and stripper
- One round punch & die: max. diameter 1"
- Adjustable electric stroke control with scale
- Three-in-one combination tool
  - Angle shear capacity: 3" x 3" x 5/16" at 90° and 2" x 2" x 1/4" at 45°
  - Bar shear capacity: 3/8" x 6"
  - Rod shear capacity: 3/4" round
- Tool table work area
- Machine stand with punch & die & tooling storage rack
- 110 volt / 1-ph electrics
- All guards necessary to comply with ANSI B 11-5 standards
- Three-year warranty on parts
- Made in the USA

**SINGLE OPERATOR**

**4 STATIONS**

## CAPACITIES AND SPECIFICATIONS

RATED ON: A36 MILD STEEL / 65,000 PSI TENSILE

<b>Punching Capacity</b>	45 ton (41 mt) 1-1/8" in 1/2" (28 mm in 12 mm)	<b>Strut Shear</b>	Samples Required
<b>Special Tooling</b>	2-1/4" Max. Dia. (57 mm Max. Dia.)	<b>Square Tube Shear</b>	1/2" to 1", 12 gauge (12 to 25 mm, 2.75 mm)
<b>Throat Depth</b>	4-1/4" (108 mm)	<b>Picket Tool</b>	1/2", 3/4" & 1" (12 mm, 19 mm, 25 mm) 16 gauge (1.6 mm)
<b>Flat Bar Shear</b>	6" Length (150 mm) 1/2" x 4" (12 x 100 mm) 3/8" x 6" (10 x 150 mm)	<b>Strokes per minute in light material</b>	20 spm (1/4" stroke) [Punch Station]
<b>Angle Shear 90°</b>	3" x 3" x 5/16" (75 x 75 x 8 mm)	<b>Strokes per minute in heavy material</b>	6 spm (3/4" stroke) [Punch Station]
<b>Angle Shear 45°</b>	2" x 2" x 1/4" (50 x 50 x 6 mm)	<b>Hydraulics</b>	2,500 psi (172 bar)
<b>Round Rod Shear</b>	3/4" (20 mm)	<b>Motor Standard</b>	2 hp 1 ph (1.49 kW) 110 v
<b>Brake 8"</b>	25 ton (23 mt)	<b>Motor Optional</b>	2 hp 1 ph (1.49 kW) 220 v

## STANDARD FEATURES

- 50-ton punch station (1-1/4" in 1/2")
- Keyed punch ram for safety
- 6" throat depth
- 2" die holder
- Punch nut with wrench & stripper
- One round punch & die: max. diameter 1"
- Adjustable stroke control
- Angle shear capacity: 4" x 4" x 3/8" at 90° and 2" x 2" x 3/8" at 45°
- 14" flat bar shear with 4-way reversible blade
- Rectangular Notcher: 2-1/2" x 2-3/4" x 3/8"
- Tool table work area
- Electrical box supplied with emergency palm button and lock-out tag-out accommodations
- 230/460 Volt / 3-ph electrics (must specify voltage)
- All guards necessary to comply with ANSI B 11-5 standards
- Forklift accommodations
- Three-year warranty on parts
- Made in the USA

# DO 70/110-24M

## STANDARD FEATURES

- Dual operator allows for two operators to work at the same time at full capacity
- 70-ton punch station (1-1/8" in 3/4")
- Keyed punch ram for safety
- 9" throat depth
- Punch gauging table with fence and scale
- Die holder complete with 2" die insert
- Punch nut with wrench
- Adjustable swing-away stripper
- One round punch & die: max. diameter 1-1/4"
- Punch jog control
- Two adjustable electric stroke controls with scale
- Two electric remote foot pedals
- Two 2-stage hydraulic pumps
- Two valves
- Angle shear capacity: 6" x 6" x 1/2" at 90°
- Rectangle notcher 3" x 4" x 1/2"
- Notcher table with guides
- 110-ton, 24" flat bar shear with sabre blade
- Shear table with miter fence
- Tool table work area
- Slug receptacles
- Electrical box supplied with emergency palm button and lock-out tag-out accommodations
- 230/460 volt / 3-ph electric (must specify voltage)
- All guards necessary to comply with ANSI B 11-5 standards
- Forklift accommodations
- Three-year warranty on parts
- Made in the USA

## STANDARD FEATURES

- 85-ton punch station (1-1/16" in 1")
- Keyed punch ram for safety
- 10" throat depth
- Punch gauging table with fence and scale
- Die holder complete with 2" die insert
- Punch nut with wrench
- Adjustable swing-away stripper
- One round punch & die: max. diameter 1-1/4"
- Punch jog control
- Adjustable electric stroke control with scale
- Electric remote foot pedal
- 6" x 6" x 1/2" slug-less angle shear
- 20" flat bar shear
- Shear table with miter fence
- Rod shear capacity 1-1/2" round, 1-1/4" square
- Rectangle notcher capacity: 3" x 5" x 1/2"
- Notcher table with scale and guide
- Two-stage hydraulic pump
- Electrical box supplied with emergency palm button and lock-out tag-out accommodations
- 230/460 volt / 3-ph electric (must specify voltage)
- All guards necessary to comply with ANSI B 11-5 standards
- Forklift accommodations
- Three-year warranty on parts

# DO 8514-20M

**DUAL  
OPERATOR**

**5  
STATIONS**

## STANDARD FEATURES

- Dual operator allows for two operators to work at the same time at full capacity
- 85-ton punch station (1-1/16" in 1")
- Keyed punch ram for safety
- 14" throat depth
- Punch gauging table with fence and scale
- Die holder complete with 2" die insert
- Punch nut with wrench
- Adjustable swing-away stripper
- One round punch & die: max. diameter 1-1/4"
- Punch jog control
- Two adjustable electric stroke controls with scale
- Two electric remote foot pedals
- Two 2-stage hydraulic pumps
- Two valves
- 6" x 6" x 1/2" slug-less angle shear
- Built-in rectangle notcher: 2" x 4" x 1/2" can be converted to 3" x 3" V-Notcher, 50-ton punch station, and 6" open end brake
- 20" flat bar shear
- Shear table with miter fence
- Rod shear: 1/2", 3/4", 1", 1-1/2" round and 1-1/2" square
- Slug receptacles
- Electrical box supplied with emergency palm button and lock-out tag-out accommodations
- 230/460 volt / 3-ph electric (must specify voltage)
- All guards necessary to comply with ANSI B 11-5 standards
- Forklift accommodations
- Three-year warranty on parts
- Made in the USA

# ShearMaster 610

## STANDARD FEATURES

- 24" flat bar shear with 4-way reversible blades
- Shear table with miter fence
- Shearing Capacity: 1" x 12", 3/4" x 16", or 1/2" x 24"
- Strokes per minute: Full stroke—12, Half stroke—30
- Hydraulic hold-down
- Electric back gauge
- Electric stroke control
- Electric foot pedal
- Two stage hydraulic pump
- 10 hp motor
- Electric box supplied with emergency palm button and lock-out tag-out accommodations
- 230/460 volt / 3-ph electrics (must specify voltage)
- All guards necessary to comply with ANSI B 11-5 Standards
- Dimensions: W-32", L-48", H-70"
- Shipping Weight: 3,065 lbs. (1,390 kg)
- Forklift accommodations
- Three-year warranty on parts
- Made in the USA

*ShearMaster 610 shown with optional 5 ft. Roller Conveyor*

## Optional Standard Tooling

### ShearMaster 610

- Work light
- 10 hp 1 phase motor
- Infeed conveyor
- Advanced feed system for fully automatic production

## CUSTOM TOOLING

Various tooling options and hundreds of punches and dies are available for every model. In addition, we build custom tooling for your special applications.

### Sample Custom Tooling Built for Special Applications

# CPO 275 Series

## STANDARD EQUIPMENT & FEATURES

- Double self-centering vise assures burr-free cuts
- Miter capabilities 45° left to 45° right
- Miter locking device: quick, accurate setting-stops at 45° left, 90°, and 45° right
- Capable of slotting
- Two cutting speeds
- Hardened and ground worm and wheel gear box
- Worm wheel of top quality bronze
- Chip drawer
- Seven-gallon coolant tank with pump
- One 10" diameter (250 mm) HSS blade
- One blade wrench
- One gallon concentrated coolant
- 230 or 460 volt/3-ph electric (must specify voltage)
- Three-year warranty on parts
- Made in the USA

## MAXIMUM CAPACITIES (WITH A 275 MM/10-3/4" BLADE)

Tube	90 Degree	45 Degree
Round	3-3/8" (86 mm)	2" (51 mm)
Square	3" x 3" (76 x 76 mm)	2" x 2" (51 x 51 mm)
Rectangle	3" x 2-3/8" (76 x 60 mm)	3" x 2" (76 x 51 mm)
Solid	90 Degree	45 Degree
Round	1-1/2" (38 mm)	1" (25 mm)
Square	1-1/2" x 1-1/2" (38 x 38 mm)	1" x 1" (25 x 25 mm)

COLD SAWS

## CPO 275

### MANUAL SAW

- Manual clamp for material vise
- Operator controlled trigger switch
- Miter locking device stops 45° left, 90° and 45° right

## CPO 275 PKPD

### SEMI-AUTOMATIC SAW

- Air-operated clamp for material vise
- Pneumatic power down feed with electric controls
- Emergency stop button

## CPO 275 PK

### MANUAL SAW WITH POWER CLAMP

- Air-operated clamp for material vise
- Operator controlled trigger switch

## SPECIFICATIONS

### Cutting Speeds (must specify when ordering)

**LT** (Low Turn) designed for solid mild steel, solid stainless steel & thick wall pipe

LT 30/60 rpm

**HT** (High Turn) designed for thin wall tube .060 wall thickness or thinner and non-ferrous material

HT 60/120 rpm

**SS** (Single Speed) designed for 220 1-ph applications

SS 60 rpm

**Factory Wired:** Specify 208 3-ph, 230 3-ph, 460 3-ph, 575 3-ph 60 Hz, or 220 1-ph (SS Model Only)

**Maximum Diameter Blade:** 10-3/4" (275 mm) **Arbor Bore:** 1-1/4" (32 mm)

## STANDARD EQUIPMENT & FEATURES

- Precision miter upcut non-ferrous saw
- Safety hood with safety switch that will not allow saw to run with hood open
- Blade door with safety interlock switch
- Dual palm buttons
- Adjustable feed rate on saw head
- Two horizontal pneumatic clamps
- Two vertical pneumatic clamps
- Miter capability 30° Left, 90° Straight, 0° Right
- Capable of slotting
- Moveable back fence for larger capacity
- Coolant tank with mist lubrication
- One gallon concentrated coolant
- One 20" (500 mm) diameter, 120-tooth carbide blade
- One blade wrench
- Air hose
- Base designed as a chip collection with two chip extraction ports
- Noise Level (DB 68)
- Adjustable leveling pads
- 230 or 460 volt/3-ph electric, (must specify voltage)
- Three-year warranty on parts
- Made in Spain

- Height:** (from floor to vise) 38 5/8"
- Shipping Weight:** 1,069 lbs. (485 kg)

# Cold Saw Options

COLD SAWS

**60" or 120" Material  
Stop Roller Conveyor  
Mounted with an  
Advanced Measuring  
Quick-Loc System**

Designed for quick, easy and accurate length setting. Available left to right or right to left material feed.

**Right-Hand Quick Loc  
with Quick Release  
Handle Mounted on a  
Roller Conveyor**

**Scale on 1/16"  
Increments**

**Blade Guide Laser Light**

### **SPECIAL NOTE**

For customer using single phase power: the variable speed allows 3-ph machine to operate with 220 volt, 1-ph power without loss of power.

**10' and 20' Material  
Supply Track**

**Special Clamping Fixture**

**CPO 275 and 350**

**Variable Speed Control**

Recommended for cutting multiple shapes, sizes, and thicknesses. RPM can be fine-tuned to achieve optimum blade speed for each application and increase blade life.

**Miter Locking Device**

**STANDARD FEATURE**  
(not available for 275 PK or 275 PKPD models)

# *Saw Gear Programmable Stop*

The SG Programmable Stop System makes every operator your BEST operator. It eliminates time and mistakes from pulling a tape measure, locking a stop, or marking your part. Simply enter the cut length required and press GO. Lengths can be entered in fractions (20-7/16"), decimal (20.437) or mm (519.01).

The standard Saw Gear Unit can be used as a stop on both the Right or Left side of the machine.

Lengths available: 8', 12' or 16' lengths  
List Storage: Holds 10 lists of up to 10 moves per list  
Position Accuracy: +/- 008" (+/- 0.2 mm)  
120 VAC (50Hz-60Hz)

***Don't Measure. Don't Mark. Just Cut.***

# Circular Cold Saw Blades • Blade Sharpening

Scotchman offers a fast, high-quality Blade Sharpening Service and will grind blades with special tooth number.

Scotchman has a complete selection of saw blades *in stock for immediate delivery.*

# CPO 315 HFA

## Hitch Feed Automatic

- Available in ferrous and non-ferrous models

# CPO 315 HFA Series

## STANDARD EQUIPMENT & FEATURES

- Fully automatic cycle
- Push button controls actuate the complete cycle
- 5 hp variable rpm speed control (ferrous model)
- 5 hp 3,000 rpm (non-ferrous model)
- Interlocking safety hood
- Clamping both sides of blade - highest quality, burr-free cuts
- Blade guides for accurate tolerances (ferrous model)
- Flood coolant (ferrous model)
- Mist coolant (non-ferrous model)
- Adjustable stroke control on the saw head
- Adjustable down feed control on the saw head for feed rate
- Piece counter
- Length scale in both inches and metric
- Quick and easy fine adjustment of length setting
- One saw blade
- One gallon concentrated coolant
- Three-year warranty on parts
- Made in the USA

## OPTIONAL EQUIPMENT

- Mist coolant
- Form jaws for multiple tubes
- Digital read-out for quick easy length setting
- Ten-foot or twenty-foot material supply track

## CUTTING CAPACITIES - BASED ON MILD STEEL

<b>Tubing</b>	
Round	up to 3-1/2" (≤ 89 mm)
Square	up to 3-1/8" x 3-1/8" (≤ 79 mm)
<b>Solid</b>	
Round	up to 2" (≤ 51 mm)
Square	up to 2" x 2" (≤ 51 x 51 mm)

# Scotchman Advanced Feed System

If you need to...increase your production,  
decrease set-up time, reduce operator error,  
and eliminate scrap...

**Scotchman Advanced Feed System**  
is the answer for you!

**Scotchman Advanced Feed System**, coupled with the advanced interconnect kit, turns your semi-automatic machine into a fully automatic production machine.

This versatile system comes complete with a programmable controller, allowing you to store up to 99 programs. The system automatically moves your material to position, clamps the material, and cycles the machine.

**Key Pad Controller**

**Material Clamp**

## KEY BENEFITS

- The system can be mounted to feed the material left to right or right to left
- With the optional material clamp, it can be used as a fully automatic programmable push feed system
- It can be used as a programmable stop system
- Program multiple lengths to minimize remnant length
- Length setting can be in feet, inches, fractions, decimals or metric
- Optional downloading from your PC
- Optional optimizing of your cut list to save on material

## STANDARD FEATURES

- Multi-offset allows for multiple tool positions
- Kerf compensation
- Full diagnostic suite
- Input-feet, inches, fractions, decimal and metric
- Can be used as a feeder or stop
- Eliminate wasted material and time from miscuts
- Miter capability on saw head
- Set point mode
- Electronic zero-point calibration
- Multi-lingual
- Increment function
- Pattern mode
- Programmable
- One-year warranty on parts
- Made in the U.S.A.

**Solid Table**

## SPECIFICATIONS

- **Working lengths available:** 4', 6', 8', 10', 12', 16', 20', 24', & 30'
- **Power requirements:** 120 volt 15 amps
- **Frequency:** 50/60 Hz
- **Motor type:** DC servo with optical encoder
- **Drive type:** Steel reinforced belt drive
- **Drive speed:** Adjustable 1" to 25" per second

# Programmable Stop

## Scotchman Programmable Stop System

Scotchman offers *five* different grades of Programmable Stop Systems.

The **SG Stop System** is an entry level programmable stop. It is priced right, yet very rugged and simple to use. All you do is enter the length required and press go. It can be mounted to move left to right or right to left and is available in 8' and 12' lengths only.

The **TS System** can be installed either as a "go to" stop or as a semi-automatic push feed system designed with a 32 mm steel reinforced mesh belt capable of pushing up to 120 pounds. It is designed to feed left to right or right to left and is available from 4' to 30' lengths.

The **TT System** is the big brother to the TS System, but is designed with a 75 mm steel reinforced cog belt that will push up to 600 pounds when mounted with a roller conveyor.

The **TR System** has the same capacity as the TT but uses a rack and pinion drive and has the ability to add a pneumatic flip-away stop and external brakes for extra holding power.

The **TS-HD2 System** is designed with a rack and pinion drive system that can push up to 1,400 pounds when mounted with a roller conveyor.

All of our Programmable Stop Systems can easily be installed on the following equipment:

- |                 |                        |
|-----------------|------------------------|
| Ironworkers     | Punch Press            |
| Cold Saws       | Drill Press            |
| Band Saws       | Bending Machines       |
| Chop Saws       | Shearing Machines      |
| Radial Arm Saws | Mandrel Punch Machines |
| Miter Saws      |                        |

*The SG Stop System mounted on this circular cold saw allows the operator to feed material from right to left. SG is available in 8' and 12' lengths only.*

*Closeup of the  
Rack & Pinion  
Drive*

*The TR connected with the SIK Switch is feeding material into the shear on a Scotchman ironworker.*

*The TT connected with the SIK Switch is push feeding the material from left to right.*

# Tube & Pipe Grinder/Notchers

Create perfect notches in just seconds using Scotchman's line of tube and pipe notching equipment. Available in both hand lever or crank wheel models, these notchers are ideal for steel and stainless steel (consult factory) tube and pipe construction, hand railings, gates and fences, race car frames and roll cages, marine arches railing, furniture frames and stainless plumbing for restaurant and dairy. Scotchman's notching equipment requires no costly dies, hole saws, grinding wheels or torch flame cutting.

## Manual Tube & Pipe Notchers

### MODEL & CAPACITIES

<b>AL1</b>	3/4", 1" and 1-1/4" pipe
<b>AL2</b>	1-1/2" and 2" pipe
<b>AL3</b>	1-1/4" and 1-1/2" pipe
<b>ALU</b>	Vent notch; maximum .155" wall thickness

### FEATURES

- Offer efficient and productive pipe notching at low cost
- Workpiece is quickly and accurately notched to a proper fit, eliminating costly filing and grinding operations
- Portable and easy to mount to any stationary surface
- Notch several diameters up to schedule 40 wall thickness
- Require no change-over or costly attachments
- Simply insert a pipe into the die block, utilizing an eccentric shaft and lever system, and pull the handle downward ...a perfect notch every time!
- The vent notching die quickly creates a uniform notch in round or square workpieces for galvanizing outflow
- 3-Year Warranty on parts
- Made in the Netherlands

## Electric Tube & Pipe Notchers

### SPECIFICATIONS

<b>Motor</b>	3-1/2 hp * 230v/460v * 3ph
<b>Dimensions</b>	30" x 13-1/2" x 11-1/2" (762mm x 343mm x 292mm)
<b>Shipping Weight</b>	AL1-2E 200 lbs. (90 kg) AL1-2U 200 lbs. (90 kg)

### FEATURES

- Equipped to notch 3/4", 1", 1-1/4", 1-1/2" and 2" up to schedule 40 wall thickness
- Units are available in 3-1/2 hp, 230 or 460 volt, 3ph
- For galvanizing, Model AL1-2U is equipped with a vent notching die to quickly create a uniform vent-notch in round or square workpieces for galvanizing outflow
- 3-Year Warranty on parts
- Made in the Netherlands

**CAUTION:** Never operate machines without safety guards in place. Machines are depicted with safety guards

*Safety guards are standard with AL 1-2E and AL 1-2U models to surround and protect notching dies*

## AL100U-01 & AL100U-02

- Produces gap-free fits ready for welding
- Smooth operation with minimal vibration
- Notches via adjustments straight = 90° to 30° in tube or pipe from 3/4" to 3" diameter in seconds (reference chart on page 4 for maximum angle with maximum diameter material)
- Two axis precision crossfeed table with hand lever feed handle and manual vise adjustment left and right (AL100U-01)
- Two axis precision crossfeed table with both handwheels and hand lever feed handle. (AL100U-02)
- Heavy duty frame and base construction
- Mandrel centerline adjustment
- One vise holds all pipe and tube sizes
- Top-mounted deburring surface
- Easy setup with vise graduated in degrees
- 13 mandrels available to ensure correct gap-free fits
- 2 belts and two pipe mandrels (1-1/4" & 1-1/2")
- Tool-free belt and mandrel change over
- 3-Year Warranty on parts
- Made in the Netherlands

## AL150

- Produces gap-free fits ready for welding
- Smooth operation with minimal vibration
- Notches via adjustments straight = 90° to 30° in pipe or tube from 3/4" to 4" diameter in seconds (reference chart on page 4 for maximum angle with maximum diameter material)
- Two axis precision crossfeed table with both handwheels and hand lever feed handle. Heavy duty frame and base construction
- Mandrel centerline adjustment
- One vise holds all pipe and tube sizes
- Top-mounted deburring surface
- Easy setup with vise graduated in degrees
- 17 mandrels available to ensure correct gap-free fits
- 2 belts and two pipe mandrels (1-1/4" & 1-1/2")
- Tool-free belt and mandrel change over
- 3-Year Warranty on parts
- Made in the Netherlands

# Tube & Pipe Grinder / Notcher Belts

## Abrasive Notcher Belts

### PRODUCTIVITY

In most applications, abrasive belt notchers dramatically increase productivity. Unlike conventional grinding wheels, abrasive belts are self-sharpening, continuously exposing fresh cutting points. This means no more dressing or replacing expensive grinding wheels. To accurately measure productivity, divide [belt cost plus labor plus overhead] by [number of parts ground].

### METAL REMOVAL

The rate of metal removal is determined by material to be ground, belt type, belt speed (SFPM) and the amount of pressure applied during grinding. Grinding belt options are provided in the charts at right.

### GRINDING BELT DIMENSIONS & SPECIFICATIONS

Model	Length/Grit	Product No.	Packaging	Notch Diameter
<b>AL100U-01</b>	4" x 78-3/4" 100mm x 2000mm / 36 GRIT	A044.00001	10 Belts Per Box	35 - 76.1 mm
	Rigid Belt for 3/4" & Larger Diameter			
<b>AL100U-02</b>	4" x 78-3/4" 100mm x 2000mm / 36 GRIT	A044.00003	10 Belts Per Box	35 - 76.1 mm
	Flexible Belt for 3/4" & Smaller Diameter			
<b>AL150</b>	6" x 78-3/4" 150mm x 2000mm / 36 GRIT	A044.00002	10 Belts Per Box	35 - 114.3 mm
	Rigid Belt for 3/4" & Larger Diameter			
		A044.00004	10 Belts Per Box	35 - 114.3 mm

# Advanced Measuring Systems

## MULTI-LOC STOP SYSTEM

The Multi-Loc Stop System allows you to set stops at various lengths to enable you to maximize your raw stock without changing your set-up each time. These Multi-Loc versions of the AMS Gauging Systems allow you to place multiple stops on the rail as close as 1" apart on the Standard System, and 1-1/2" apart on the Heavy Duty System. Three stops come with each assembly and either system is available in Left-Hand & Right-Hand models. Additional Multi-Loc Stops are available.

To operate, simply set the stops to your cut list dimensions. Slide the material past the stops you do not want to use, right to the desired setting. Press the material against the fence and the flippers on the stops not used move away.

Multi-Loc Stop Systems are available in 1/16" increments and in standard lengths of 5', 10', 15', 20', & 25'. Longer lengths can be achieved by joining rails together.

*The Multi-Loc Stop System makes setting your production runs faster. It is as easy as picking up the stainless steel stop and pressing it down at the dimension you want.*

**A GUARANTEE, WITH TEETH!** While the teeth align the stop to the dimension you choose, they also add incredible strength. Once set, the teeth guarantee the stop will never slip or move. The teeth in our stop systems allow operators to increase accuracy, reduce set-up time, and eliminate waste.

## QUICK-LOC STOP SYSTEM

The Quick-Loc version is available in Left-Hand & Right-Hand models. Numerous accessories have been designed to customize this system to your special needs. A listing of the accessories can be found on the following page. It is available in increments of 1/16", and in standard lengths of 5', 10', 15', 20', & 25'. Longer lengths can be achieved by joining rails together.

Our exclusive teeth feature allows you to quickly set our Quick-Loc Stop using the built-in measure. In seconds, your work station is set up and locked in.

*Simply squeeze the handle on the Quick-Loc Stop System, slide it into position, and release it. The teeth on the stainless steel stop align themselves to the teeth on the rail to give you exactly the dimension you set. Once set into place, the stop cannot slip!*

### •Fast

*Simply move the stop to the correct setting and let go. The gauge aligns itself to the dimension you selected. It's as easy as picking up & pressing down the Multi-Loc or sliding the Quick-Loc to the setting.*

### •Accurate

*Once set, the teeth guarantee the stop will never slip or move, eliminating measuring errors and waste.*

### •Repeatable

*The same dimensions can be repeated again and again by different operators on different operations, even on different days.*

### •Cost Effective

*The investment will be quickly returned in lower labor costs, reduced makeovers and less waste.*

# AMS - Loc Stop System Accessories

Stop Systems for all your Gauging Applications

## Quick-Loc Arm

Enables you to cut several pieces together, at one time.

## 10" Extension shown on a Quick-Loc Arm

**In Memory of Art Kroetch**  
1926-2007  
Founder of Scotchman Industries

Quality materials and construction, dependable performance, competitive pricing, and service have made Scotchman Hydraulic Ironworkers, Circular Cold Saws, Band Saws, Tube & Pipe Notchers, Advanced Measuring Systems, and Advanced Feed Systems the preferred choice of metal fabricators, machine shops, and technical schools throughout the world.

Established in 1967, our factory and corporate offices are family owned and located in Philip, South Dakota. Factory representatives assist dealers worldwide and we have an authorized dealer near you.

For over 45 years, Scotchman has been turning ideas into products that help metal fabricators do things easier & more efficiently. Our company goal is to produce quality products that satisfy customer needs. The results can be seen in our product line that represents solutions.

As the world and its markets change and expand, Scotchman Industries continues to grow and adapt. Scotchman Industries, indeed, provides your Metal Fabricating Solution.
